VENI
Dorado 76
**The Most Elegant
State of Insulation**

Insulation

Manufactured with a width of 76 mm, New Dorado 76 delivers a high degree of heat insulation with a 9 mm internal-external elegant look, which is a first at the PVC sector, a 5-cubicle profile structure, triple glazing of up to 52 mm and a lower heat transmission value (*Uw=0,98 W/m²K).

Design

In addition to an elegant and insulated structure, New Dorado 76 Window and Door Systems has a futuristic style of design. With a frame-leaf structure with a successive and hard edges, it fully fits the modern façades. Employs special design profiles that offer a high level of resistance to the wind load in multi-storey buildings.

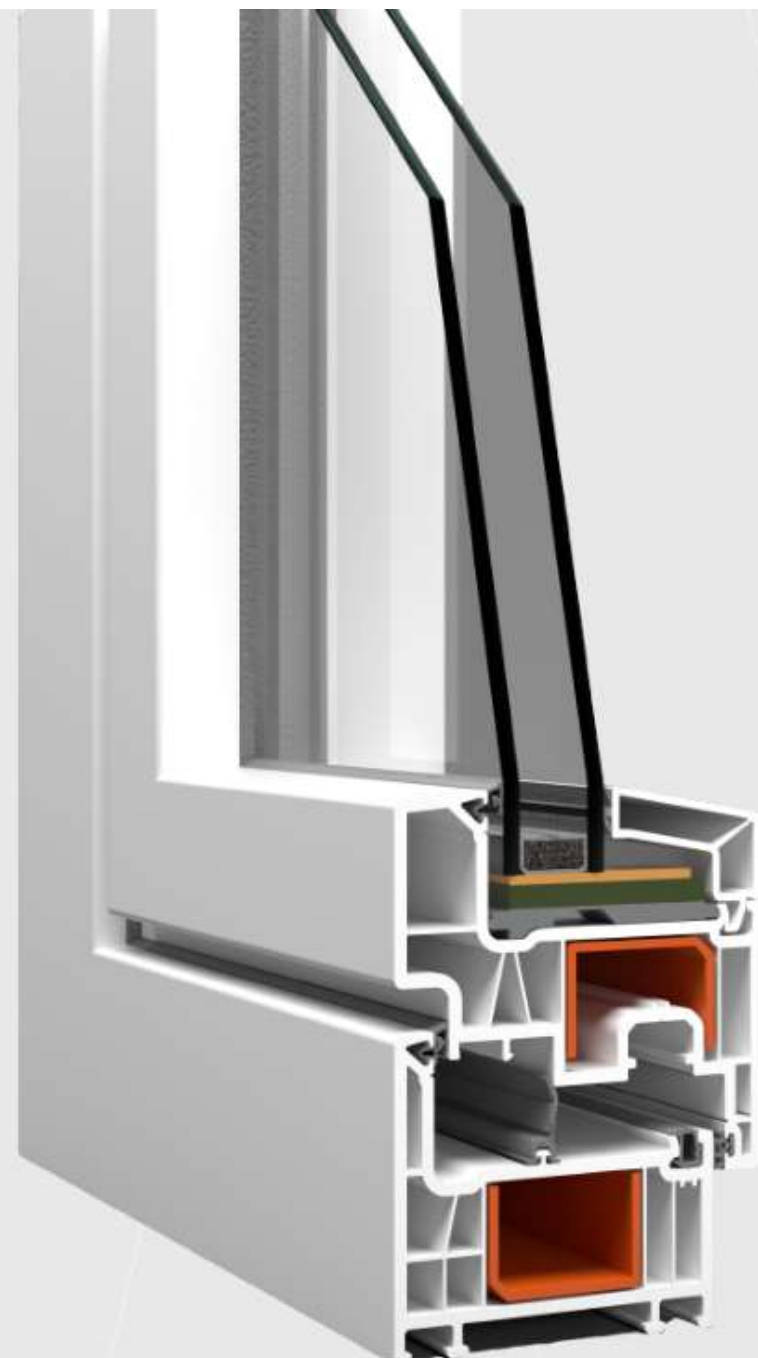

Equipment

Applicable in all the structures with the options single opening, double opening, parallel sliding, folding, pivot and secure equipment specially designed for the Winsa PVC Systems. All the equipment fully matches the colors of the Winsa PVC Window, Door and Sliding Systems delivering an elegant look.

Technical Specifications

VENI Dorado 76

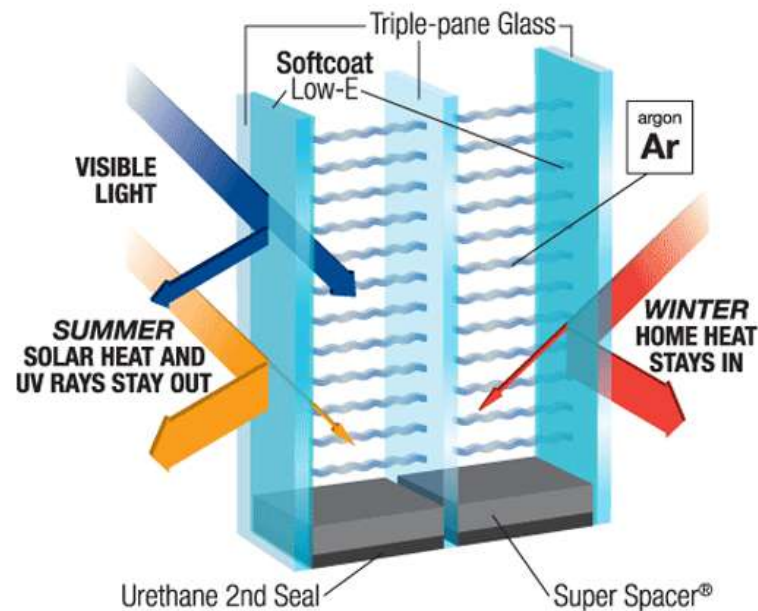

Profil Width:	76 mm
Number of Cubicles:	5
Year:	Class A - EN 12608-1
Gasket:	TPE Gray / Black
Number of Gaskets:	3
Glazing Bead:	Single Claw - PCE Gasket
Glazing Thickness:	24, 30, 36, 44, 52 mm

Colors

	Golden Oak		Antique Oak
	Anthracite Gray		Hazelnut
	Silver		Cream
	Ash Black		Mahogany
	Metallic Anthracite		Metallic Silver
	Valonia Oak		Mink
	Winchester		Unlimited Color

According to the [Vitro \(formerly PPG\) Glass Education Center](#), there are several factors used to measure the effectiveness of glass with Low-E coatings:

- **Solar Heat Gain Coefficient (SHGC):** This is the fraction of incident solar radiation that is admitted through the window. This can be either directly transmitted and absorbed or radiated inward.
- **U-Value:** This is the rating that is given to a window based on how much heat loss it allows.
- **Visible Light Transmittance (VLT):** The measure of how much visible light passes through the glass.
- **Light to Solar Gain:** The ratio between the window's visible light transmittance and its Solar Gain Coefficient rating.
